Argon Corporation Selected to Provide Hand Held Displays (HHD) for Ground Soldier Ensemble (GSE) Program

Great Neck, New York –Argon Corporation has been selected by General Dynamics C4 Systems, Scottsdale, Arizona, to provide the Hand Held Display (HHD) for the Ground Soldier Ensemble (GSE) program that was awarded to General Dynamics and two other contractors in April 2009. This multi-year program will bring increased situational awareness lower down the echelon to increase mission effectiveness and soldier survivability.

The Hand Held Display will be the leader's secondary display used by commanders to view, create, and edit mission plans, overlays, and graphics. The HHD is a 7-inch diagonal, 800 x 600 resolution with ruggedized analog resistive touch screen, pointing device and daylight readability. The display is packaged in an extremely compact 7.5 inch x 5 inch x 1.2 inch enclosure, including provisions for grabbing the display from a pocket or pouch.

“Argon Corporation is honored to be a part of the GSE program,” said Mike Forde, Senior Director at Argon Corporation. “Argon will bring its expertise in compact rugged displays that have the smallest mechanical outline, weight and power consumption on the market ensuring that our war fighters have the most capability with the least impact on their ability to perform the mission.”

About Argon Corporation

Argon Corp, located in Great Neck, New York, has over 15 years of experience in designing, producing and supporting a variety of COTS rugged computing and display solutions that have been deployed in land based, naval and airborne applications. These solutions are also suitable for adjacent applications where extreme, combat-like environments are present, such as oil and gas exploration, mining activities and others where the product must reliably operate under extreme environments.

Argon Corp has developed a strong reputation for working with customers to design solutions to meet their exact requirements for their intended application. Over the years our products have demonstrated a high degree of reliability that can only be achieved from fielded use and periodic updates. As such, Argon Corp is a partner you can trust.

Argon products include rugged displays ranging in size from 7” (wearable) to 20.1” (command and control applications). We offer compact soldier wearable computing solutions (weighing 1.8lbs) to deployable workstations/laptops with up to 20.1” displays.
