Argon Corporation Expanding Operations in the Atlanta Ga. Metro Area

Great Neck, New York – Argon Corporation, in fulfillment of its growth strategy has signed a lease for a new facility in the greater Atlanta area. Over the last 1.5 years, Argon has been positioning itself to evolve from a low volume boutique defense business to an enterprise capable of delivering large quantities of high quality, lower cost rugged display and computers to the Defense and Homeland Defense market space. The new facility is located at 1225 Old Alpharetta Road, Alpharetta, Georgia and will initially be 11,000 ft² dedicated to the manufacture and delivery of Argon products. The design and prototyping will remain at our Great Neck, New York facility, where we have a seasoned and successful development team. We wish to thank all of our customers for their trust and support of Argon over the years, for without whom we would not be expanding.

Commented Mike Forde, COO, “We are pleased that we have the opportunity to expand in the Atlanta area where there is a rich technology base and a favorable business climate. In addition, we are proud that we will be in a position to support the economy by hiring skilled labor and doing our part to reduce unemployment in these uncertain economic times.”

We are also proud to announce the appointment of Will Hedrick as the Production Manager of the Argon Atlanta facility. Will brings over 25 years of experience of various operations staff and management positions for the production of military computers, video/graphics and display products. He has held positions in production test, production planning, inventory control and ERP system implementation experience. He has been trained in Lean practices and ISO 9001 processes and is a Six Sigma Greenbelt. Along with Mike and the entire Argon team, a key task of Will is to spearhead the implementation of ISO 9001 in the new facility leading up to third party certification. Mike Forde comments, “We are very pleased that Will has come on board and is excited about the opportunity to start up this facility. We are confident that we will soon have a world class facility to better serve our customers and the U.S military.”

About Argon Corporation

Argon Corp, located in Great Neck, New York, has over 20 years of experience in designing, producing and supporting a variety of COTS rugged computing and display solutions that have been deployed in land based, naval and airborne applications world wide.

Argon Corp has developed a strong reputation for working with customers to design solutions to meet their exact requirements for their intended application. Over the years our products have demonstrated a high degree of reliability that can only be achieved from fielded use and periodic updates. As such, Argon Corp is a partner you can trust.

Argon products include rugged displays ranging in size from 5" (portable) to 20.1" (command and control applications). We offer compact wearable computing and display solutions (weighing 1.8lbs) to deployable workstations/laptops with up to 20.1" displays.
