# Cynthia Panter Joins Argon Corporation in Support of its Continued Growth

**Great Neck, New York** – Argon Corporation is pleased to announce the appointment of Cynthia Panter to our management team. Cynthia joins the company after 10 years of experience that includes manufacturing engineering, process engineering, supply management and production planning. More recently she held the position of Planning Manager at Barco Duluth with a focus of “On Time In Full” (OTIF) delivery performance.

In her new role she assumes the position of Argon Quality and Manufacturing Manager. First and foremost she will take over leadership of the ISO9001:2008 planning process with a goal to achieve certification of the Alpharetta site by mid 2011.

Commented Mike Forde, COO “We are pleased that Cynthia has accepted this position. Her deep manufacturing hands on process experience makes her a perfect candidate to successfully guide Argon through the ISO certification process and implement practical and beneficial quality processes throughout the company. Her multi divisional experience will also help us to improve our hand off from design and test in New York to production in Alpharetta.”

Cynthia will be located at our new facility in the North Atlanta suburbs, reporting to Mike Forde, General Manager of Argon Alpharetta.

The new facility is located at 1225 Old Alpharetta Road, Alpharetta, Georgia and has 11,000 ft<sup>2</sup> dedicated to the manufacture and delivery of Argon products. The sales and marketing team is also located here. Design, prototyping and test remains at our Great Neck, New York facility, where we have a seasoned and successful development team.

Cynthia has a Bachelor’s degree in Industrial Engineering from the Georgia Institute of Technology.

### ***About Argon Corporation***

*Argon Corp, headquartered in Great Neck, New York, and with production facilities in Alpharetta, Georgia, has over 20 years of experience in designing, producing and supporting a variety of COTS rugged computing and display solutions that have been deployed in land based, naval and airborne applications world wide. Argon Corp has developed a strong reputation for working with customers to design solutions to meet their exact requirements for their intended application. Over the years our products have demonstrated a high degree of reliability that can only be achieved from fielded use and periodic updates. As such, Argon is a partner you can trust. Argon products include rugged displays ranging in size from 5” (portable) to 20.1” (command and control applications). We offer tablet solutions, rugged peripherals to deployable workstations/laptops with up to 20.1” displays.*
