## Argon Corporation Awarded ARL-20 B-52 Display Replacement

**Alpharetta, Georgia** – Argon Corporation is pleased to announce that we have been awarded a multi-year award to design, develop and qualify a 15” rugged LCD replacement display for the aging CRT display now used on the ALR-20 EW station onboard the B-52 aircraft. After development, production follow on will commence in support of a full fleet update, plus spares.

Argon has been working many months with personnel at Warner Robins AFB to secure this order. Argon’s solution provides a cost effective display replacement program that will save the USAF money now spent for costly support of the existing system, provide a long term supportable solution and a more reliable display.

Argon was able to leverage off our existing product line to offer the USAF a customized COTS solution. For nearly two years, Argon has been in continuous production of our RWS15, which incorporates a 15” rugged LCD. With a proven product, the technical and schedule risk of this program is significantly reduced.

“We are proud to be sole source selected for this important and long term update program and look forward to expanding our business opportunities at WRAFB by meeting and exceeding our commitments”, commented Mike Forde, COO Argon Corporation. “This win represents a significant milestone for Argon. It was guided by Tom McLaughlin, who worked closely with the team at WRAFB to ensure that Argon provided the right solution and met all of their requirements”.

### ***About Argon Corporation***

*Argon Corp, headquartered in Great Neck, New York, and with production facilities in Alpharetta, Georgia, has over 20 years of experience in designing, producing and supporting a variety of COTS computing tablet, rugged computing and display solutions that have been deployed in land based, naval and airborne applications world wide. Argon Corp has developed a strong reputation for working with customers to design solutions to meet their exact requirements for their intended application. Over the years our products have demonstrated a high degree of reliability that can only be achieved from fielded use and periodic updates. As such, Argon is a partner you can trust. Argon products include rugged displays ranging in size from 5” (portable) to 20.1” (command and control applications). We offer tablet solutions, rugged peripherals to deployable workstations/laptops with up to 20.1” displays.*
